MÉTALL

CRAFTED IN METAL

A legacy of craftsmanship, strength, and timeless design.

For centuries, wood and metal have shaped the world's most enduring architecture, furnishings, and interiors. From hand-crafted wood furniture and forged ironwork of the past to modern architectural design today, these materials have remained timeless symbols of strength, artistry, and permanence.

Throughout history, finely crafted metal furnishings have represented durability, artistry, and status. Their ability to endure through generations has made them a lasting part of homes, hospitality spaces, and architectural environments around the world.

At Métall, we honor that tradition through modern craftsmanship and artistic fabrication. Every piece is carefully built using premium materials, architectural finishes, and hand-applied grinding techniques that create movement, depth, and individuality in every surface. By blending metal with rich natural woods, we create pieces that balance strength with warmth combining modern architectural form with the timeless character of organic materials.

Metal offers a rare balance of strength and refinement. It allows for clean modern lines, sculptural forms, custom sizing, and seamless integration with wood, stone, glass, and fire features. Each design is created to bring presence into a room while maintaining the durability required for everyday environments.

Our furniture is designed not only for today, but to become part of the spaces and stories that continue for generations.

Built with intention. Crafted with purpose. Designed to last.

Furniture that doesn't just fill space — it defines it.

WHY METALL FIRE PITS

BUILT TO BE PASSED DOWN, NOT REPLACED

Crafted from recycled 12-gauge stainless steel, guaranteed never to rust. Backed by a limited lifetime warranty, these fire pits are built indestructible.

CROSS FIRE BRASS BURNERS

Warming Trends Venturi Jet Technology delivers taller flames and 360° infrared heat, using less fuel than standard burners.

WATER STOP TECHNOLOGY

Exclusive design prevents water from plugging the burner for reliable ignition even in heavy rain.

MULTIPLE IGNITION OPTIONS

Choose match-lit simplicity or upgrade to push-button spark ignition for effortless one-touch lighting.
